Comments regarding question 2:

none

Comments regarding question 4:

the projections that were included with the original application were not achievable, as there aren't that many 7/8th grade students in the district. The numbers above reflect the total number of 7/8th grade students who participated in Project Alert last year. Some 8th graders also received the booster lessons. these numbers reflect those who received the curriculum. It is possible that the grant writes included boosters into their totals, thereby projected the same students multiple times

Comments regarding question 14:

These are the students who participated in creating media messages, the number on the previous page is those who potentially saw the campaigns.

Comments regarding question 17:

We did not track this data. Given the extremely high rates of tobacco use in rural Butte County compared to the rest of California we consider ALL students to be part of a high priority group, we anxiously await the day when rural areas are recognized as being high priority by the rest of the state.

2012/13 Tobacco-Use Prevention Education (T.U.P.E.) Competitive Grant Annual Report

Comments regarding question 19:

370 total students were presented the CIM material, the 60 listed above were those who were then identified as users or who were identified through other means.

Comments regarding question 22:

again, we did not track this. In a rural county where the prevalence rate is well above 20% of the population, they are ALL priority populations. It is safe to say that 85% of those who participated in CIM groups come from low socio-economic backgrounds.

Comments regarding question 37:

Unfortunately there are no agencies that offer intervention or cessation for youth or adults. The health dept. has helped with youth development and media campaigns.
